

Day	Project Name	Key Features		
1	Personal Brand Landing Page	Hero section, skills grid, and a contact form with Tailwind gradients.		
2	Digital Business Card	Social links, profile image, and hover animations using framer-motion.		
3	Interactive FAQ Accordion	Toggle logic for showing/hiding answers; focus on state management.		
4	Unit Converter	Length/Weight conversion logic with real-time input updates.		
5	Testimonial Slider	Array of objects; "Next" and "Prev" buttons to cycle through cards.		
6	Customizable Theme Toggle	Light/Dark mode implementation using Tailwind's dark: class and localStorage.		
7	Password Generator	Checkboxes for numbers/symbols; use navigator.clipboard to copy output.		
8	GitHub Profile Finder	Use the GitHub API to fetch user data and display repository cards.		
9	Weather Dashboard	Fetch real-time data from OpenWeatherMap; dynamic icons based on weather.		
10	Movie Search App	Use TMDB API; implement a search bar and "Favorite" button logic.		
11	Recipe Book (API)	Search recipes by ingredient; display cooking time and calorie count.		
12	Cryptocurrency Tracker	Live price updates using CoinGecko API; basic list filtering.		
13	Dictionary App	Fetch word definitions and pronunciations using a free Dictionary API.		
14	Multi-Step Survey Form	Manage complex state across multiple views using a "Next/Back" flow.		
15	Advanced Task Board (Kanban)	Columns for "To-Do," "Doing," and "Done." Persistent storage.		
16	Expense Tracker with Charts	Visualize spending using Chart.js or Recharts.		
17	E-commerce Product Filter	Filter products by category, price range, and rating.		
18	Real-time Markdown Previewer	Split-screen editor that renders Markdown as HTML instantly.		
19	Quiz App with Timer	Score tracking, timed questions, and a final summary page.		
20	Notes App with Categories	Add tags/colors to notes; search functionality via content or title.		
21	Budgeting Dashboard	Calculate remaining balance based on income vs. monthly expenses.		

Day	Project Name	Key Features		
22	AI Personal Assistant	Integrate OpenAI API to create a simple chat interface.		
23	Image Gallery with Drag-and-I	Use dnd-kit to reorder images; focus on UI responsiveness.		
24	Social Media Clone (UI Only)	Build a complex layout like Instagram or Twitter (X) with Tailwind.		
25	Job Board with Auth	Login/Signup using Firebase; save "Applied Jobs" to a user profile.		
26	AI Content Generator	Tool that generates blog headlines or social captions using AI.		
27	Portfolio with GitHub ISR	A site that automatically fetches and displays your live GitHub repos.		
28	Music Player Dashboard	Play/Pause/Skip logic; visual progress bar for audio tracks.		
29	Advanced Auth Dashboard	Role-based access (Admin vs. User) with protected routes.		
30	Final Mega Project	Combine AI, Auth, and CRUD into a SaaS Landing Page Template.
